History of AllMeds

For over 20 years, AllMeds has provided essential solutions and services that have improved the quality and economics of specialty practices across the U.S. Today, AllMeds' suite of cutting-edge tools includes:

Specialty medicine's most comprehensive and effective **Electronic Health Record (EHR)** that reduces documentation chores and improves coding accuracy.

A revolutionary **Practice Manager (PM)** with intelligent workflow tools that greatly improve business efficiencies throughout the office.

A flexible **Revenue Cycle Management (RCM)** service that optimizes billing and collection functions to dramatically improve bottom-line.

Uniquely effective **Support Services** that help practices successfully navigate complex federal programs that impact compliance and reimbursements.

Combined, they supply specialty practices with the digital resources needed to provide higher-quality care at a lower operational cost.

EHR

AllMeds EHR is used by specialty practices throughout the U.S. to:

Reduce physician documentation chores.

Radically enhance officewide workflows and efficiencies.

Improve coding accuracies and reimbursements.

The heart of AllMeds EHR – and the key to much faster documentation – is its specialty clinical library, which is continuously developed by AllMeds’ medical consultants, informatics specialists and thousands of practicing physicians, who use the EHR every day in their own offices.

Physicians harness a suite of powerful tools, including AllMeds’ exclusive [ExpressDocs™](#) and [ExpressPhrases™](#),

to quickly complete documentation and instantly delegate critical tasks throughout the office. [SureCode™](#) harnesses the EHR’s deep clinical content to prepare complex codes for a more accurate and efficient billing process.

Finally, practices leverage [MIPS|assist™](#) and other unique service programs to simplify participation in complex federal programs and better ensure positive outcomes and reimbursement rates.

PM

AllMeds Practice Manager (PM) provides the advanced workflow solutions and business intelligence tools required by practices to achieve their operational goals and maintain financial independence in today's increasingly competitive environment.

Because practices are increasingly reliant on payments made directly by patients, AllMeds PM provides effective tools, such as the **Patient Payment Estimator, Online Bill Payment, and Electronic Statements** to efficiently collect payments upfront, online and on-time.

Practices leverage AllMeds PM to mitigate rising overhead costs with cloud technology that minimizes costly equipment expenditures and **SmartQ™** automated workflows that proactively route tasks to appropriate and available resources.

Interactive dashboards and an extensive (and customizable) reports library provide convenient access to the critical data you need to analyze and improve the most important parts of your practice.

RCM

Today's increasingly complex billing environment frequently leads to decreased cash collections, greater denial rates and increased A/R, while also making it more difficult and costly for practices to maintain their own qualified billing resources.

AllMeds Revenue Cycle Management (RCM) provides highly qualified billing and collections services that deliver significant cost savings, more efficient reimbursement performance, and dramatically improved bottom lines. Benefits of AllMeds' specialty-focused RCM team include greatly improved net collection rates, reduced overall A/R, streamlined denial management, and enhanced customer services and satisfaction.

Available in temporary, supplemental, or turnkey models, AllMeds RCM provides a host of critical services, including patient eligibility and payment estimators, specialty coding edits and feedback, claims submissions, denial management and payment posting, and direct customer services such as statement processing, payment follow-up, and full collections services.

Revitalize Your Specialty Practice

In today's increasingly difficult health care environment, independent specialty practices must be able to rely on partners that instinctively understand the unique needs they face every day.

For over two decades, practices throughout the U.S. have relied on AllMeds' specialty-focused solutions and services to succeed and thrive in the midst of constant change and challenge.

Contact us today and find out how AllMeds can make a world of difference to your practice.
