

Systems Engineer

AllMeds, Inc., a leader in Electronic Health Records located in Oak Ridge, TN, is currently seeking a talented individual to join our Systems Engineering team as a Systems Engineer. The Engineering team at AllMeds is a diverse group of professionals that manage numerous processes for the company including software installation, software upgrades, data center operations, corporate network support, and client technical support. The successful candidate will be organized, flexible, and have excellent personal interaction skills.

Responsibilities for this position include:

- Corporate asset and license management
- Server and network support
- Data center infrastructure support
- Vendor relationship management

Primary technical skills:

- Windows 2008 and 2012 server administration and Active Directory
- SQL Server Maintenance and Administration (2008+)
- Distributed IIS Application deployment and Maintenance
- Layer 2 & 3 switch administration
- Firewall and router administration (Fortinet experience preferred)
- In-depth troubleshooting experience with server and network performance issues
- Ability to create and maintain detailed documentation

Secondary technical skills:

- Windows 7/10 Desktop administration
- Knowledge of TCP/IP, VLANs and VPNs (remote access and site-to-site)
- VOIP support and administration
- vCenter administration
- Data center resource monitoring
- Office 365 administration
- Mobile Device Management support

Preferred skills:

- A bachelor's degree in Computer Science or related field
 - 3-5 years' experience managing a technical team
 - Experience with achieving and maintaining HIPAA compliance
- Industry certifications are considered, though this position will be filled on aptitude and experience rather than certifications. Relocation assistance is not offered for this position. This is an on-site position with no travel.

AllMeds offers competitive compensation along with an excellent benefits package. AllMeds is an equal opportunity employer.
